

# Road studs for enhanced night visibility

## Raised pavement markers are essential to roadway safety

ENNIS-FLINT® by PPG STIMSONITE® road studs improve delineation and increase preview time in vulnerable areas, even under wet conditions. Made from hard wearing and high performance injection moulded polymers.

Road studs are an excellent solution for signaling before reaching a warning zone such as an intersection or lanes of merging traffic with cyclists.

### Design

Prismatic design and advanced optics provide for greater reflectivity and durability

Available in a wide range of lens colours

### Installation

Non-plowable markers have specially engineered bottoms that ensure aggressive grip to the roadway

Polycarbonate casting creates a rust-free surface

Fast application and easy to replace

### Key Benefits

Durability and adhesion combine with advanced optics and optimal abrasion resistant treatments to deliver lasting retroreflectivity

Tactile warning to drivers and cyclists

Provide delineation under adverse weather conditions

### Certification

Facility is ISO 9001:2015 certified for the design, development and manufacturing of raised pavement markers

CE marking according to EN1463-1 & 2
